WORK EXPERIENCE

Product Designer | Remote | 2019 - Present
ARTKEY MEDIA AG · SWITZERLAND

In my current role, I collaborate closely with ArtKey Media's development team to spearhead the comprehensive redesign of their flagship product, with the aim of creating an intuitive and user-friendly platform. My contributions span the entire design process from gathering functional requirements to developing wireframes, mockups, and prototypes to address both functionality and design aspects. Additionally, I am instrumental in translating these designs into actual layouts using HTML and SCSS, thereby ensuring seamless alignment between design vision and implementation.

Head of Design | Remote | 2020 - Present
CINEMALOOP INC · USA

As the Head of Design at Cinemaloop, I led the strategic design initiatives, playing a pivotal role in shaping the direction of the web and mobile applications. My responsibilities encompassed crafting the MVP design, defining the visual style, and conceptualizing key features. This leadership role allowed me to drive the design strategy and ensure a cohesive user experience across both platforms.

Product Designer | Remote | 2018 - 2020
IESOLUTIONS PORTUGAL · PORTUGAL

As a Freelance Designer at iesolutions, I collaborated extensively with the team to craft engaging web and mobile interfaces for clients. Primarily focused on web-based projects, I also undertook the design of a couple of mobile applications. This dynamic role allowed me to contribute my design expertise to a diverse range of projects, ensuring seamless integration between design and development for optimal user experiences.

Product Designer | Ponta Delgada | 2015 - 2017
CONNEXALL · PORTUGAL / CANADA

At Connexall, I spearheaded the design and development of a comprehensive social platform complemented by multiple associated applications such as the chat app, smart home app, e-commerce app, newspaper app, and more. I also introduced a dynamic gamification system to enhance user engagement. Further, I designed a healthcare app catering to the needs of a local hospital.

My responsibilities spanned brainstorming sessions, user testing, and the complete design lifecycle. This encompassed creating interactive wireframes, prototypes, high-fidelity mockups, and culminating in the hands-on implementation of HTML and SCSS for seamless user experiences.
